

TITANO

is a top level executive collection with a wooden structure that will furnish prestige offices in an elegant, modern style.

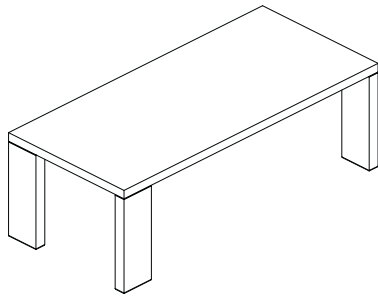

01

Desks

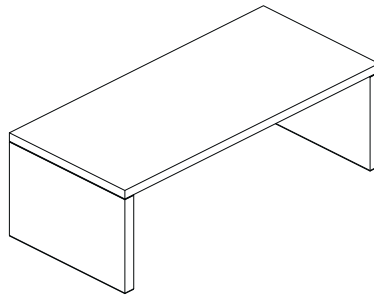

The 60 mm thick work tops feature a special 475 kg/m³ dense wood fibre board (LINEX). The legs are produced by the folding process using an 18 mm thick particle board panel. Legs and tops are veneered and available in several finishes.

Desks come with different structures so that the customer may choose from corner legs (A) or panelled ones (B). The corner leg solution can be rotated using the drills pre-prepared on the top.

A

B

Both corner and panelled legs feature an elegant, chrome-plated profile with levelling feet for millimetric adjustment (+25 mm), the hollow structure of which can house wiring to create an elegant, practical unit.

The following options are available for the rectangular or shaped work tops:

- precomposed wood veneered top;
- leather top with visible stitching and veneered edges.

02

Return desks

The Titano collection includes independent or hook-on return desks. The latter are secured to the desk by means of a common metal plate measuring 300x135x3 mm. Return desks have the same specifications as desks.

03

Modesty panel

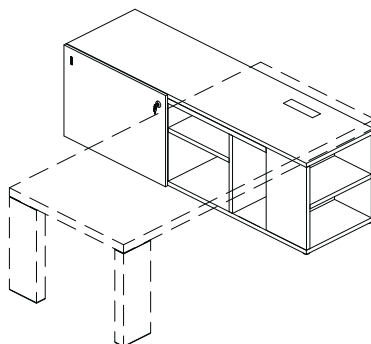

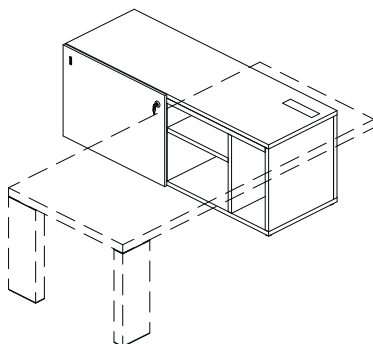

An 18 mm thick modesty panel, available in several finishes, can be fitted under the work top:

- melamine faced;
- precomposed wood veneered.

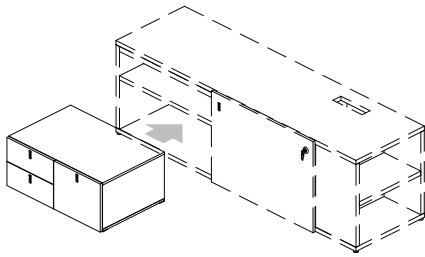

04

Structural service storage units

Desks can be provided with structural storage units with a melamine structure and CPU compartment. The area under the desk top can be closed (A) or open (B).

Both solutions have a wooden sliding door with lock. On demand a drawer pack can be added, with two melamine-faced drawers and a filing unit with soft closing mechanism. Doors and fronts are provided with chrome-plated vertical handles flush with the panel.

Storage units have magic tops that provide access to the rear internal compartment for wire management.

05

Meeting tables

Meeting tables are rectangular or shaped and can come with single or modular tops.

Meeting tables with single tops are available with the following types of structures:

- precomposed wood veneered corner leg;
- precomposed wood veneered panelled leg;
- painted or chrome-plated metal circular base.

Tops are available with the finishes described above for desks.

Modular meeting tables have panelled legs joined to each other by an anodised extruded aluminium, "C" profile beam with an external section of 181x97 mm.

06

Coffee tables

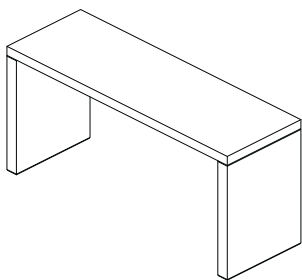

Titano also includes H.400 mm coffee tables with the same specifications used for desks.

07

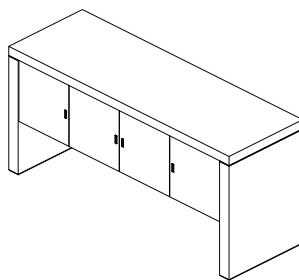

Consoles

A console is available in precomposed wood veneer, without storage space (A) or with hinged doors (B).

A

B

The following options are available for storage unit doors:

- precomposed wood veneered;
- precomposed wood veneered door covered on the outside with leather, visible stitching and veneered edge;
- melamine-faced door covered on the outside with leather, visible stitching and veneered edge;
- embossed door covered on the outside with leather, visible stitching and veneered edge;
- polished aluminium frame and methacrylate panel.

08

Bookcase

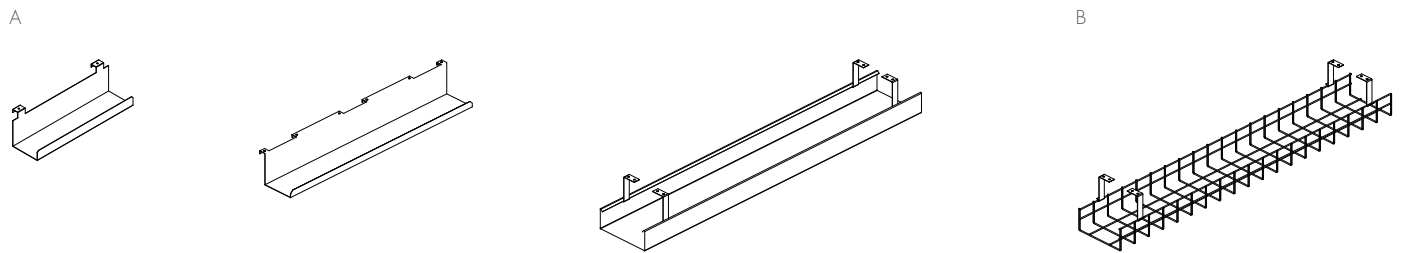

The Titano collection is completed by a coordinating bookcase with load-bearing side panel and 30 mm thick melamine-faced structure. The following options are available for any doors and back panels:

- door and/or back panel veneered in precomposed wood;
- door and/or back panel veneered in precomposed wood and covered on the outside with leather, visible stitching and veneered edge;
- door and/or back panel melamine faced and covered on the outside with leather, visible stitching and veneered edge;
- door and/or back panel embossed and covered on the outside with leather, visible stitching and veneered edge;
- door with polished aluminium frame and methacrylate panel.

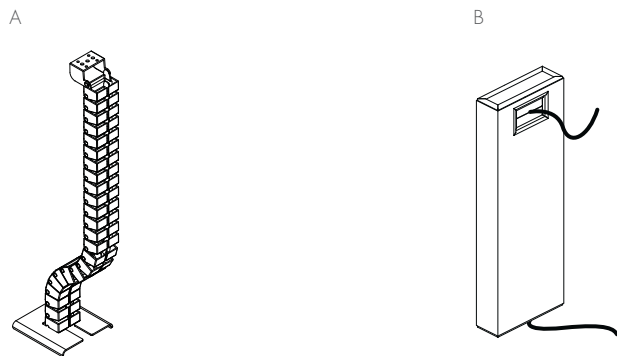

The bookcase has modules with 2 widths (380 and 760 mm) and 7 modules with different heights (450, 860, 1270, 1680, 2090, 2500 and 2910 mm). The bookcase can stand next to or on top of the console.

09 Electrification

Desk and meeting table tops can be provided with PVC wire management systems in different sizes and aluminium modular access plates. On demand these elements can be placed to personal requirements.
When there is no structural beam desks can be supplied with a metal wire management tray (A) or one in steel rod (B), secured to the top.

Vertical electrification can be provided with a translucent polycarbonate spine wire management system connected to the wire management tray (A). As an alternative, on the version with corner legs one of the legs can be provided with an aluminium cable gland (B).
