Intra

Nowadays, styles of working that require people to liaise with one another frequently are increasingly being encountered in management spheres too. These are areas where new design concepts are just as welcome as more movement in sedentary workspaces to keep body and mind agile. Which is why the Intra chair range combines a contemporary and compelling design language with dynamic movement options.

The chair's seamless looking seat shell, its organic lines, sophisticated upholstery and integrated controls bear testimony to a modern understanding of management culture. With precision-adjustable height and a synchronous adjustment mechanism fitted to the seat, the chair adapts automatically to people of different weights. All they need to do is sit down, adjust the seating height and get down to the job at hand. Meetings could hardly be more agile.

Design: Phoenix Design

Function

Conference, lounge and executive chair range in a contemporary design with integrated synchronous adjustment mechanism that automatically adapts to the weights of people sitting on it.

Frame

Five-star base in die-cast aluminium, bright chrome-plated, matt-polished and coated in black or white with a textured matt finish. Round plastic multipurpose glides, colour-matched with the frame, for all types of flooring: bright chrome-plated when the frame is bright chrome-plated, matt-polished or coated in white with a textured matt finish, in black when the frame is coated in black with a textured matt finish.

For wooden floorings (e.g. parquet) please order with extra felt insert. Version on glides optionally available with swivel-return mechanism and without height adjustment (seating height 45 cm). Optionally with castors. Twin wheel swivel castors with load-dependent braking, made of black polyamide compliant with DIN EN 12529 as the standard version for carpets; with grey soft polyurethane facing for hard floors. The gas lift is covered with a protective tube colour matched with the frame, bright chrome-plated, matt-polished or coated black or white with a textured matt finish. Precision adjustable seating height via a gas lift.

Seat

Seat shell made of fibreglass-reinforced polypropylene covered with fabric or leather, with polypropylene seat upholstery panel, seat cushioning made of polyurethane with padding in the same material as the cover with side facings. The cushioning and covers are replaceable. The synchronous adjustment mechanism with automatic weight adjustment is integrated between the seat shell and upholstery element.

Backrest

Backrest shell made of plywood, fully padded with polyurethane (CFC-free) with additional padding. Curved flat steel backrest bearer to connect with the synchronous adjustment mechanism

Armrests

Die-cast aluminium armrests, bright chrome-plated, matt-polished or coated in black or white with a textured matt finish depending on the type of frame, optionally with integrated, leather-covered armrest pad. The armrest pads come in black 74/99 leather for fabric-covered models and are the same colour as the leather in leather-covered models. The controls for adjusting the height and locking it in place are integrated in the armrests.

The digital sample colours differ from the originals.

Wilkhahn

Whether the chairs are covered in leather or fabric, the seat and backrest shells are fully upholstered so that the surfaces have the same appeal from all sides. The precise double saddle stitching on the upholstery covers testify to the highest level of craftsmanship and long-lasting quality. The stylish aluminum armrests are wide enough for arms to rest on in comfort and additional, optional leather armrest pads can be added.

Frame surfaces

Bright chrome-plated aluminium or matt polished, coated in black or a white textured matte finish.

The carefully modeled star bases are optionally available with chrome-plated or black glides or modern casters. The difference in height is compensated for by gas springs in different heights, so that both models have the same adjustment range and can be combined accordingly.

The levers for changing the height and operating the synchronous adjustment mechanism are also fitted discreetly into the armrests and seat shell. The automatic weight adjustment feature ensures that the slightest shifts in weight encourage a healthy change of posture. If no movement's required, the backrest can be locked in a vertical position.

In the high backrest model, in addition to the top-stitched "wing backs", an integrated head/neck rest ensures maximum relaxation and divides up this section of the chair neatly.
